

Sample Document for Conversion

This is a test document to demonstrate the doc_converter.py functionality.

Features of the Document Converter:

- Converts between multiple formats (PDF, Word, HTML, Markdown, Text)
- Supports batch processing
- Auto-detects file formats
- Works globally from any directory

Key Benefits:

1. Easy to use command-line interface
2. Multiple conversion options
3. Preserves document structure
4. Fast and reliable processing

Technical Details:

The converter uses various Python libraries:

- pypdf for PDF handling
- python-docx for Word documents
- markdown for Markdown processing
- beautifulsoup4 for HTML parsing

Example Usage:

```
doc-convert sample.txt --to pdf
```

```
doc-convert report.md --to html
```

```
doc-convert document.docx --to pdf
```

This tool makes document conversion simple and efficient!
